There are many self-help books on the dynamics of wealth building and on strategies that lead to a successful life. The thesis of this book challenges current definitions of wealth and success. Is substantial net worth measured by the accumulation of money and “stuff” the hallmark of success? Can anyone who accumulates substantial financial assets actually be unsuccessful? Or is there a better method to assess true success and wealth...and its significance in today's materialistic world?

The purpose of this book is to introduce a radical and inspiring concept to interweave the goals of success, wealth, and significance to increase meaning in life. It will help to redefine success and wealth a based on one's personal, financial, and social life. The goal is to replace preconceived notions of wealth and replace them with a new, broader dimension –

3 Dimensional Wealth™.

Here's what some have said:

“Finally, someone has something profound to say about “real” wealth. Enough of just “more, more, more”... 3 Dimensional Wealth is a cool breeze in a world made up of so much hot air.” John Gambling, WABC Radio Talk Show Host, NY, NY

“This is the kind of nuts-and-bolts book that integrates into one package a process that will help keep you focused on the important things of this world.” Edward Ney, Chairman Emeritus of Young & Rubicam and Former US Ambassador to Canada
